Cable sensor silicone

Silicone cable 6x50mm

Order number: 010.07989

Order code: Kabelfuehler Silikon xx Länge

Overview:

Cable temperature sensors are a very cheap alternative for temperature measurement of gaseous and liquid media in the HVAC sector. The sleeve sensor can be used with or without an immersion sleeve to record temperatures. All cable sensors listed by us are rolled in a moisture-tight manner (double stamped) and thus optimally protected against corrosion. The standard connection cable is fixed at 2m and a diameter of 6mm. Product quality: Made in Germany

Typical applications:

- heating systems
- ventilation systems
- air conditioners
